TRANSCORE.

FEATURES

- Configures AP4118 Rail Tag Programmer only
- Secure tag data can be used by AP4118 Rail Tag Programmer only
- Can be used once or multiple times where scheduled reconfigurations are required
- Factory programmed to specific customer requirements
- Uses Super eGo[®] (SeGo) operation mode
- Factory-sealed case

PT5780 Permissions Tag

The PT5780 Permissions Tag is used to configure the AP4118 Rail Tag Programmer. Multiple programmer parameters, such as programmer control number, serial number, and tag programming certification expiration date are transferred from the PT5780 to the AP4118 via the RF link. The AP4118 validates the PT5780 data and, if valid, stores the data in the programmer's non-volatile memory.

The PT5780 may be used once during the lifetime of the AP4118 or may be required for scheduled reconfiguration. In some cases, multiple PT5780s may be required at a single site, enabling tag programming for multiple owners or to support multiple configurations.

The PT5780 uses the SeGo mode of operation. This prevents accidental misapplication of the permissions tag within the North American rail infrastructure, which includes a large number of ATA-mode reader systems.

The PT5780 is used exclusively to configure the AP4118 with factoryprogrammed information specific to each customer; user programming applications cannot modify the tag data.

PRODUCT PROFILE

SPECIFICATIONS

PT5780 Permissions Tag

COMMUNICATIONS

Frequency Range 902 to 928 MHz

Polarization Parallel with longer side

SOFTWARE FEATURES

Memory

The tag is factory-programmed only as determined by specific customer requirements.

Security

The PT5780 is used exclusively to configure the AP4118 with factory-programmed information specific to each customer; user programming applications cannot modify the tag data.

POWER REQUIREMENTS

Power Source Beam-powered

LIFE EXPECTANCY

Service Life Unlimited

PHYSICAL

Dimensions Size: 9.4 x 2.4 x 0.8 in (23.9 x 6.1 x 2 cm) Weight: 6.2 oz (175 g)

Case Material Factory-sealed, red case

ENVIRONMENTAL

Operating Temperature $32^{\circ}F$ to $+122^{\circ}F$ (0°C to $+50^{\circ}C$)

Storage Temperature -4°F to +185°F (-20°C to +85°C)

Humidity 95% relative humidity, noncondensing between 77°F to +122°F (25°C to +50°C)

Vibration 1.04 G_{rms}, 5-500 Hz

Shock, Normal Environment 4 G, half-sine pulse, 11 ms duration, 3 axes

OPTIONS

Factory Programming

PT5780 Permissions Tags are programmed at the factory to customer specifications.
